Companies given state grants

Some Arizona companies have new money to boost their businesses.

A total of 27 of the Governor's AZ Fast Grants were awarded to companies across the state, by state government and the national Small Business Administration.

A new radiation treatment for cancer, a blood test to diagnose Alzheimer's disease before symptoms appear and a cost-effective water filtration system are just some of the technologies from Arizona firms that have received one of the AZ Fast Grants, worth \$4,000 to \$5,000 apiece.

Here is a complete list of the companies receiving AZ Fast Grants:
